<https://github.com/Soumyadeep-Mukherjee-2004>

Final year BTech student with a solid foundation in **web development** and specialized knowledge in advanced technologies such as **React.JS** and **Node.JS**. Skilled in **developing responsive** and **dynamic web applications**. Capable of conducting **unit testing**, **functionality testing**, and **deployment** tasks.

EDUCATION

BTech in Electronics and Communications Engineering
from JIS College of Engineering

Sep 2023 - July 2027

- 7.91 CGPA

Higher Secondary Education from Paharhati Golapmani High School

2023

- 66.40%

Secondary Education from Paharhati Golapmani High School

2021

- 86.71%

TECHNICAL SKILLS

- C
- Python
- JAVA (OOP)
- HTML
- CSS
- JavaScript
- React.JS
- Node.JS
- API
- SQL
- Data Structures

PROJECT EXPERIENCE

Trade assist - A Retail Customer Contact support

June 2026 - Present

- A **full-stack Support Workbench application** for a retail business, enabling customer support agents to manage customer queries and issues from a centralized platform.
- Implemented **customer management and search functionality**, allowing agents to **create customer records** and access **profiles, purchase history**, and existing **support cases**.
- Built features for **case creation and customer fund management**, helping agents efficiently resolve customer requests from a single application.
- Developed and integrated **REST APIs** using **Node.js** and **Express.js**, with **Prisma ORM** and **PostgreSQL (Neon)** for efficient database operations.
- **Tools & Technologies:** React.js, Node.js, Express.js, PostgreSQL, Neon, Prisma, Postman, Render, Taiga, GitHub.
- **GitHub:** <https://github.com/Subhratanu-Saha/trade-assist-app>
<https://github.com/Subhratanu-Saha/trade-assist-api>
- **Live Server:** <https://trade-assist-app.onrender.com/>

Floating Water Waste Extractor using IoT [Patent Application No.: 202531057459 A] May 2025 - June 2025

- Developed a **semi-autonomous** floating robotic system with an inclined conveyor belt and storage chamber to collect and **remove floating waste** from water bodies.
- Integrated propulsion, sensors, rechargeable battery, and remote/voice control to enable **guided navigation, obstacle detection**, and efficient waste collection.
- **Tools & Technologies:** Arduino Uno, Motor Drivers, Sensors, Conveyor Belt, Camera, Load Cell, Solar Panel, Rechargeable Battery.

ADDITIONAL INFORMATION

- **Languages:** Bengali, Hindi, English.
- **Certifications:** Database management System from IIT Madras by NPTEL, Programming in JAVA from IIT Kharagpur (Elite + Gold) by NPTEL
- **Awards:** 2nd position in project submission in JIS TECH 2k26, 1st position in inter college hardware model competition.
- **Publications:** AI-Optimized Antenna Design for 5G/6G Networks published in JETIR Journal on Volume 12 issue 5 May, 2025.
